

TOKES PLATFORM

WELCOME TO THE REVOLUTION

OUR PROMISE TO YOU

We fundamentally believe that the legalized cannabis industry and its consumers should have the same liberties and transactability as other businesses. We should not have to hide in the shadows of grey and biased regulation, nor exist as cultural outsiders.

TOKES Platform is forward thinking, developed with the latest financial technology to make your business bankable, while bringing you desirable customers across diverse demographics. Our goal is to provide financial solutions while advocating for a societal paradigm shift and the normalization of cannabis culture.

TOKES TRANSACTION PROTOCOL

We provide a digital currency solution dedicated to the Cannabis Industry via a token called "TOKES." The token can be used by customers to make in-dispensary purchases, and in a B2B capacity across industry participants.

FIAT GATEWAY

Until regulations on banking change, you must have a way to securely store your money. We can make that happen; something no other solution can claim.

MOBILE APP

A digital point of sale in every customer's pocket. The app allows customers to get information on strains, find dispensaries, and pay for goods instantly.

TANGIBLE PRODUCT CATALOG

Tangible product development will provide revenue to re-invest in the TOKES Platform to ensure long-term success and viability.

ADVOCACY

Lobbying and general advocacy will be critical to continuing to move the cannabis industry mainstream. We aim to lead the charge.
